报告题目 Tools for T cells: New ways to understand T cell responses in infectious diseases, autoimmunity and cancer

报告人：Mark M. Davis PhD

美国国家科学院院士 HHMI
斯坦福大学免疫研究所主任

报告时间：11月13日上午10:00

报告地点：9号楼9501会议室

主持人：杨鹏远

报告人简介

Dr. Davis is well known for identifying many of the T-cell receptor genes, which are responsible for the ability of these cells to recognize a diverse repertoire of antigens. Other work in his laboratory pioneered studies of the biochemistry, genetics and cell biology of these molecules and T lymphocytes generally, which play a key role in orchestrating immune responses. His current research focuses on obtaining a “systems level” understanding of the human immune system.
